

Today's modern U.S. Coast Guard

Members of USCG PSU 312's Engineering Dept. work on a Viper engine. Maintenance is an essential part of GTMO's maritime safety and security.

The USCG is a military, multi-mission, maritime service and one of the nation's five Armed Services.

Photos by MC1(SW) Terry Matlock
Special thanks to USCG PSU 312 for their support.

MK2 David Peebles and MK2 Alex Rodriguez troubleshoot a port engine motor.

Viper boats are seen on a regular basis in and around the waters of Guantanamo Bay, Cuba.
